NHS Foundation Trust

Transforming Cancer Care

Summary consultation document:

**A public consultation on a
new cancer hospital providing
expert care for the people
of Merseyside and Cheshire**

We want your views!

28th July - 19th October 2014

**ACTION
ON CANCER** 

Welcome

Cancer affects most of us at some point in our lives. Currently, one in every three people in the UK will develop cancer and that figure is predicted to rise. Cancer rates in Merseyside and Cheshire are among the highest in England and cancer is the biggest single cause of death in our area – greater than heart disease and stroke combined. If the rate of deaths from cancer in Merseyside and Cheshire was the same as the average for England, then 589 lives could be saved every year.

That means people in our region have a very personal stake in the future of cancer care. It's something that really matters.

This document explains the thinking behind our proposals, what they involve and what they would mean for patients. It also asks for your views on them and we really do want to hear what you think. Please get involved and have your say.

This is a summary consultation document. The full version is available at www.transformingcancercaremc.nhs.uk or by contacting the consultation team on engagement@cmcsu.nhs.uk or 0151 296 7068.

Cancer Centre

Alison Tonge

Alison Tonge,
Area Director (Interim),
NHS England Cheshire,
Warrington and Wirral
area team

Why change?

We have superb cancer services in Merseyside and Cheshire. The Clatterbridge Cancer Centre NHS Foundation Trust – the specialist cancer hospital for this area – is nationally renowned and consistently ranks as one of the best in the country, both for quality of care and patient feedback.

Yet if we are to ensure that people here are truly to benefit from world-class cancer care in coming years, we cannot stand still. We need to Transform Cancer Care for the following reasons:

- The number of people with cancer is set to rise as the population ages. We need to expand cancer services to meet that demand so people right across Merseyside and Cheshire can access the best specialist care.
- The Clatterbridge Cancer Centre doesn't have access to intensive care or medical and surgical specialties on its main site in Wirral. This is increasingly important in providing the best care to the sickest patients. Someone with cancer may need input from a heart or kidney specialist, for example, while having treatment. At the moment, they may have to be transferred by ambulance to another hospital for this, interrupting their cancer care.
- The Wirral site isn't centrally located for the Merseyside and Cheshire population it serves. Around 63 per cent of The Clatterbridge Cancer Centre's current patients live closer to central Liverpool than to Wirral.
- To continue providing the best cancer care, The Clatterbridge Cancer Centre's experts need to carry out research and clinical trials. At the moment we can't carry out some trials because they can only take place in centres with intensive care and other key specialties on site.

Design concept showing how the new cancer centre could look from West Derby Street

74 inpatients were transferred by ambulance from The Clatterbridge Cancer Centre in 2013 because there was no intensive care or medical / surgical expertise on site. That's increased from 53 in 2011 and this trend will continue as the population ages and more people have long-term conditions like heart disease and diabetes. A new cancer centre beside the Royal Liverpool University Hospital would have intensive care and medical/ surgical expertise on site.

Background

In 2008, a detailed review commissioned by Merseyside and Cheshire Cancer Network concluded The Clatterbridge Cancer Centre needed on-site access to acute medical and surgical specialties to provide the best care to sicker, older patients into the future. Their view was endorsed this year by the government's National Clinical Advisory Team.

Our vision

Our vision for Transforming Cancer Care is that:

- All patients should be able to access the best care and most advanced treatment, facilities and equipment as close to home as possible.
- Cancer care should be seamless throughout the whole patient journey from diagnosis to treatment and beyond. Different professionals and organisations involved in a patient's care should work together in a fully joined-up way.
- People receiving inpatient (overnight) cancer care should have rapid on-site access to experts in intensive care and medical/surgical specialties if they need it, without having to be transferred by ambulance to another site.
- All cancer patients should be offered the chance to take part in clinical trials if they wish to do so.

- It should be easy for NHS healthcare professionals, university academics and cancer researchers to work together so patients receive the very best care.
- Merseyside and Cheshire should become a world-class centre of excellence in cancer so patients can benefit from the most advanced expertise, treatments and research, including 'first in human' clinical trials.

The proposals

Transforming Cancer Care is a £118m investment in improving cancer care that would:

1. Expand the services provided by The Clatterbridge Cancer Centre to meet the increasing demand for specialist cancer care as the population ages, and diagnosis and treatments improve.

2. Develop a new Clatterbridge Cancer Centre in the heart of Liverpool, alongside Royal Liverpool University Hospital, the University of Liverpool and Cancer Research UK's Liverpool Cancer Trials Unit. This would become The Clatterbridge Cancer Centre's main site.
3. Continue to provide outpatient treatment for most cancer at The Clatterbridge Cancer Centre in Wirral and its second radiotherapy unit at Aintree. Its chemotherapy clinics and outpatient clinics at local hospitals across Merseyside and Cheshire would also continue. The Wirral site would be redeveloped so patients continued to benefit from high-quality facilities.

Key benefits

The new centre would...

- Have on-site access to the intensive care, medical and surgical specialties in the Royal Liverpool University Hospital.
- Increase capacity and choice by offering radiotherapy at three sites rather than two and expanding The Clatterbridge Cancer Centre to meet increasing demand for specialist cancer care.
- Provide services at a central location that's closer to home for the majority of patients and has excellent public transport links.
- Be on the same health campus as the University of Liverpool, Royal Liverpool University Hospital, Cancer Research UK's

Liverpool Cancer Trials Unit and other key research partners.

- Be a hub for a much wider range of world-class cancer research and clinical trials, enabling people in Merseyside and Cheshire to benefit from the latest and most advanced forms of cancer treatment.

The Clatterbridge Cancer Centre's role

The Clatterbridge Cancer Centre NHS Foundation Trust is the specialist cancer hospital for the 2.3m people in Merseyside and Cheshire and surrounding areas including the Isle of Man. It provides chemotherapy, radiotherapy and other non-surgical cancer care for adults with solid tumours (i.e. not blood cancers); it also provides radiotherapy for children.

What would change?

- There would be a new cancer hospital in the heart of Liverpool, closer to home for around 63% of patients than the Wirral site.
- Inpatient care (including the Teenage and Young Adult Unit) and a relatively small percentage of outpatient treatments would move from Wirral to the new centre in Liverpool. This is because they are more complex.
- Seriously ill patients would have on-site access to experts in other specialties and intensive care if they needed it, without the need for an ambulance journey.
- Cancer experts from different hospitals, the university and key research partners would be together, offering new scope for research. Patients could also access a much broader range of clinical trials.
- For the first time, cancer surgery, chemotherapy, radiotherapy, intensive care, inpatients, outpatients, and acute medical/surgical specialties would be available together on one site.
- The Wirral site would receive further investment and redevelopment so local patients could be confident of receiving the same high standard of care and facilities.

only need to travel to Liverpool for inpatient care, the more complex treatments or treatment as part of an early-stage clinical trial. All outpatient chemotherapy would be available at Wirral, as well as radiotherapy for common cancers including breast, prostate and lung.

- The specialist national centre for eye proton therapy – the only service of its kind in the UK – would also remain at Wirral.
- The satellite radiotherapy unit at Aintree would remain, with radiotherapy for common cancers and the specialist stereotactic radiosurgery service for brain tumours.
- The local chemotherapy clinics in hospitals and other locations across Merseyside and Cheshire would also continue.
- Patients from all parts of Merseyside and Cheshire would receive equally high-quality care.

What would stay the same?

- The warm, compassionate Clatterbridge care patients value so much.
- We estimate around 90 per cent of Wirral and West Cheshire patient attendances could continue to take place in Wirral. Patients would

Proposed timescale

Milestone	Date
Formal public consultation	July-Oct 2014
Evaluate consultation feedback	Oct-Nov 2014
Outline business case	Autumn 2014 – Summer 2015
Full business case	Summer 2016
Construction of new cancer centre in Liverpool	Summer 2016 – Summer 2018
Redesign of existing cancer centre in Wirral	Autumn 2018 – Autumn 2019

Transforming Cancer Care isn't just a new building. We're also looking at improvements – for example, offering patients greater choice for chemotherapy and radiotherapy. This may include evening and weekend appointments if there's enough demand. We're keen to hear your views on this.

People in Merseyside and Cheshire are 20% more likely to die of cancer than the average for England. This is thought to be due to social factors such as deprivation, not seeking medical help at an early stage and lifestyle (including smoking and diet).

What would be provided where:

	Current	Proposed
Wirral	<ul style="list-style-type: none"> Inpatient beds Teenage & Young Adult unit Outpatient radiotherapy Outpatient chemotherapy Outpatient appointments Planning & diagnostic imaging National eye proton therapy Specialist support services 	<ul style="list-style-type: none"> Outpatient radiotherapy (except complex) Outpatient chemotherapy (except complex) Outpatient appointments Planning & diagnostic imaging National eye proton therapy Specialist support services
New centre in Liverpool	N/A	<ul style="list-style-type: none"> Inpatient beds Teenage & Young Adult unit Planning & diagnostic imaging Outpatient radiotherapy Outpatient chemotherapy Outpatient appointments Specialist support services
Aintree	<ul style="list-style-type: none"> Outpatient radiotherapy for most cancer Outpatient appointments Specialist support services 	<ul style="list-style-type: none"> Outpatient radiotherapy (except complex) Outpatient appointments Specialist support services
Chemotherapy clinics	<ul style="list-style-type: none"> Network of chemotherapy clinics in other hospitals as well as on CCC's Wirral site 	<ul style="list-style-type: none"> Network of chemotherapy clinics in other hospitals as well as on CCC's Wirral and Liverpool sites
Outpatient clinics	<ul style="list-style-type: none"> Outpatient clinics in other hospitals 	<ul style="list-style-type: none"> Outpatient clinics in other hospitals

Patients from Wirral and West Cheshire

We expect around 90 per cent of Wirral and West Cheshire patient attendances could continue to be at the Wirral site. Only the inpatient beds, Teenage & Young Adult Unit and some complex outpatient care would move to Liverpool.

Options considered

We considered lots of options while developing the proposals. This summary of the shortlisted options explains why we believe the new centre should be on the Royal Liverpool University Hospital site.

Option	Outcome
Option 1 - Do nothing	Failed to address current issues
Option 3 - Cancer centre on Royal Liverpool site. Inpatient beds in Royal Liverpool University Hospital	Viable but scored lower across the majority of areas including strategic fit, patient experience, clinical outcomes and staffing as inpatients would not be under CCC's specialist cancer care
Option 4 - Cancer centre on Royal Liverpool site. Inpatient beds in it	Preferred option – this is the one we are now consulting people about
Option 5 - Cancer centre on Aintree hospital site	Viable but scored lower across the majority of areas, most specifically research due to its distance from the main university site. Also scored lower on strategic fit, patient experience, clinical outcomes and staffing e.g. it is less centrally located for the geographical area served by CCC

“Earlier diagnosis and more effective treatments can only be achieved through high-quality research. This requires team working between Clatterbridge specialists, experts from medical and surgical specialties so we can offer novel treatments in a safe environment, and cancer research specialists from the university. Transforming Cancer Care provides a unique and exciting opportunity to harness this potential and is fundamental to our aim of improving cancer outcomes for our patients.”

Prof Dan Palmer, Cancer Professor, Head of the Academic Oncology Unit and Consultant Oncologist, University of Liverpool and The Clatterbridge Cancer Centre

How healthcare professionals, patients and the public have been involved

Consultant doctors and other healthcare professionals specialising in cancer have developed these proposals. Patients and carers have also been involved.

We've done this in a variety of ways including the Clinical Design Group of doctors, nurses, radiographers and other healthcare professionals. A Patient Reference Group of former cancer patients and relatives/carers has been advising us on our proposals.

We also carried out extensive public engagement from August 2012 to March 2013, with events and meetings across Merseyside and Cheshire and a questionnaire asking your views. In total, we reached almost 90,000 people and 4,164 people responded to the questionnaire; almost 83% of them said the proposals were a good idea.

People highlighted the same key themes whether or not they thought the proposals were a good idea – accessing services, travel and transport, quality of care, and the friendly Clatterbridge culture.

Dr Peter Kirkbride, Medical Director of The Clatterbridge Cancer Centre and Chair of the National Radiotherapy Clinical Reference Group for NHS England

"Clinicians are fully supportive of these proposals. It's likely that in future we will need to deliver more cancer treatment to older patients with more complex medical needs. The need to have access to those specialist acute medical services will become even greater."

Importance of cancer research

Providing the best cancer care to people in Merseyside and Cheshire requires health professionals with the most advanced expertise in their field and who carry out clinical trials of new treatments that patients can access.

Our region already has a good reputation for certain kinds of cancer research but there is research we can't do because The Clatterbridge Cancer Centre doesn't have intensive care and medical and surgical specialties on site. It's also not that close to the university and other key research partners.

Having a new cancer centre on the same site as the Royal Liverpool University Hospital and the University of Liverpool would significantly increase the amount and type of cancer research we could do, with massive benefits for patients for generations to come.

How it would be funded

The proposals would be a capital investment of £118m in improving cancer care. Around half of this money is already secured. It would be funded by The Clatterbridge Cancer Centre's reserves and NHS commissioners, supported by a charitable appeal and a small amount of borrowing at low interest from government sources. It isn't a private finance initiative.

"By and large, services would remain at Wirral for local people. That's good because that's what we want. It's essential for inpatients, however, that the cancer hospital is next door to an acute hospital so I would welcome a new centre in Liverpool."

Calvin Wood, Wirral patient

Travel and transport

- Parking would be free for patients attending the new cancer centre, just like it is at The Clatterbridge Cancer Centre's Wirral and Aintree sites.
- Anyone entitled to ambulance transport for appointments would continue to receive this.
- Around 63 per cent of the current patients would have shorter travel times to the Liverpool site than to Wirral. This includes the most disadvantaged patients, who are least able to travel.
- There are better public transport links to central Liverpool than to Wirral from most parts of Merseyside and Cheshire.
- We would work closely with transport providers to make journeys as easy as possible for the small percentage of patients who live closer to Wirral but would need to travel to Liverpool under the proposals. (We expect around 90 per cent of Wirral and West Cheshire patient attendances could continue to be at Wirral.)

Practical examples of what the changes would mean

John, 55, from Wirral: bowel cancer

Now: John has surgery at Arrowe Park followed by chemotherapy and radiotherapy at The Clatterbridge Cancer Centre in Wirral.

Under the proposals: There would be no change. John could still be treated at his local hospital and The Clatterbridge Cancer Centre's Wirral site.

Charlie, 16, from Wirral: bone cancer

Now: Charlie has inpatient chemotherapy on the Teenage & Young Adult Unit at The Clatterbridge Cancer Centre in Wirral. When he develops a fever and becomes seriously unwell, he is transferred by ambulance to Arrowe Park's intensive care unit.

Under the proposals: Charlie would be admitted to the Teenage & Young Adult Unit in the new cancer centre in Liverpool but when he became unwell the intensive care team from the Royal Liverpool University Hospital could come and assess him. He wouldn't need to be transferred to another hospital interrupting his cancer care.

Design concept showing how the entrance to the new centre could look

Alison, 60, from Chester: breast cancer

Now: Alison wants to take part in an early clinical trial for a new drug that she thinks could help her. However, it can only be provided on a site with easy access to other medical and surgical specialties so isn't available at The Clatterbridge Cancer Centre.

Under the proposals: The trial could be carried out at The Clatterbridge Cancer Centre, saving Alison from having to choose a 90-mile round trip in order to take part.

Tommy, 75, from Southport: prostate cancer

Now: Tommy has to make a long journey from Southport to Wirral for an appointment to plan his radiotherapy treatment, then has radiotherapy at The Clatterbridge Cancer Centre's unit on the Aintree University Hospital site.

Under the proposals: Tommy could have his treatment planning appointment at the new cancer centre in Liverpool, saving him the journey to Wirral. He could continue having his radiotherapy on the Aintree site.

TEAR HERE AND RETURN

We want your views: consultation questionnaire

Thank you for your interest in our proposals for **Transforming Cancer Care**. We are very keen to hear your views and totally committed to taking them into account – and showing how we have done this – in any decisions about these proposals. You can tell us what you think by completing the consultation questionnaire in this document. Simply tear off the following pages and post to: Freepost - Patient & Public Voice, Cheshire and Merseyside CSU, 65 Bevan House, 3rd Floor, Stephenson Way, Liverpool, L13 1HN. You can also complete the questionnaire online at www.transformingcancercaresmc.nhs.uk.

The closing date for responses is 19th October 2014.

A number of public consultation events are taking place across Merseyside & Cheshire. If you want to find out about your local event, or if you have any questions or would like further information, please contact us on 0151 296 7068, engagement@cmcsu.nhs.uk or via Twitter @CCCNHS. The full programme of consultation events is also available at www.transformingcancercaresmc.nhs.uk

CONSULTATION QUESTION 1

Do you support the vision outlined on page 4?

Yes No

Do you believe our proposals will help deliver it and improve the quality of care that people with cancer receive in Merseyside and Cheshire?

Yes No

Can you briefly tell us why?

CONSULTATION QUESTION 2

Do you feel any groups would be affected – either for the better or the worse – by the proposed changes? (Please choose only one answer for each group.)					
Patients	Significantly better <input type="checkbox"/>	Slightly better <input type="checkbox"/>	Undecided <input type="checkbox"/>	Slightly worse <input type="checkbox"/>	Significantly worse <input type="checkbox"/>
Family	Significantly better <input type="checkbox"/>	Slightly better <input type="checkbox"/>	Undecided <input type="checkbox"/>	Slightly worse <input type="checkbox"/>	Significantly worse <input type="checkbox"/>
Carers	Significantly better <input type="checkbox"/>	Slightly better <input type="checkbox"/>	Undecided <input type="checkbox"/>	Slightly worse <input type="checkbox"/>	Significantly worse <input type="checkbox"/>
Other visitors	Significantly better <input type="checkbox"/>	Slightly better <input type="checkbox"/>	Undecided <input type="checkbox"/>	Slightly worse <input type="checkbox"/>	Significantly worse <input type="checkbox"/>
Please explain why:					
<hr/> <hr/> <hr/> <hr/> <hr/>					

CONSULTATION QUESTION 3

If you've visited The Clatterbridge Cancer Centre's Wirral or Aintree sites, what can we learn from them for a new centre? (E.g. are there aspects you particularly value about services/care at the current sites?)
<hr/> <hr/> <hr/> <hr/> <hr/>

TEAR HERE AND RETURN

Is there anything we don't currently do or provide at Wirral or Aintree that you think we should consider for the new centre?
<hr/> <hr/> <hr/>

CONSULTATION QUESTION 4

Appointment times at the moment are usually Monday to Friday, 9am-5pm. We're keen to know if you think this should be extended. Your views will help us make sure Transforming Cancer Care is delivering services that people want and need.

If you were offered an early morning, evening or weekend appointment*, would you find this...? (Please choose one answer only for each time/day.)					
<i>*It doesn't matter if you have ever had cancer or not. We are interested in your views anyway.</i>					
Early morning (7.30am-9am)	Much more convenient <input type="checkbox"/>	Slightly more convenient <input type="checkbox"/>	The same <input type="checkbox"/>	Slightly less convenient <input type="checkbox"/>	Much less convenient <input type="checkbox"/>
Evening (5pm-7.30pm)	Much more convenient <input type="checkbox"/>	Slightly more convenient <input type="checkbox"/>	The same <input type="checkbox"/>	Slightly less convenient <input type="checkbox"/>	Much less convenient <input type="checkbox"/>
Saturday	Much more convenient <input type="checkbox"/>	Slightly more convenient <input type="checkbox"/>	The same <input type="checkbox"/>	Slightly less convenient <input type="checkbox"/>	Much less convenient <input type="checkbox"/>
Sunday	Much more convenient <input type="checkbox"/>	Slightly more convenient <input type="checkbox"/>	The same <input type="checkbox"/>	Slightly less convenient <input type="checkbox"/>	Much less convenient <input type="checkbox"/>
What would make it easier for you to attend appointments out of hours?					
<hr/> <hr/> <hr/>					

CONSULTATION QUESTION 5

We want to ensure all patients receive the safest, highest-quality care as close to home as possible, but which is more important to you? (Please tick one answer only.)

Quality of care provided

Distance travelled to receive it

Don't know / can't decide

CONSULTATION QUESTION 6

Our doctors and other clinical staff believe inpatients who need to stay in hospital overnight would get better, safer care on a site with intensive care and other specialists. Do you agree?

Yes No

CONSULTATION QUESTION 7

We know that people find it harder to travel when they are ill. People entitled to ambulance transport would continue to receive this under these proposals. Parking would be free for patients.

Would any of the proposed changes affect you personally in terms of travelling for treatment or to visit someone? (Please tick 'better', 'worse' or 'no' on each of the options below).

Parking availability	Better <input type="checkbox"/>	Worse <input type="checkbox"/>	No <input type="checkbox"/>
Public transport to hospital	Better <input type="checkbox"/>	Worse <input type="checkbox"/>	No <input type="checkbox"/>
Tunnel fees	Better <input type="checkbox"/>	Worse <input type="checkbox"/>	No <input type="checkbox"/>
Other (please specify)			
<hr/>			
<hr/>			
<hr/>			

TEAR HERE AND RETURN

If you feel the proposals would make your journey harder, would any of the following make these changes easier? (Tick all that apply.)

Bus stop location

Dedicated car parking

Appointment times e.g. evenings (please give details)

CONSULTATION QUESTION 8

Have you got any other comments about any of the proposals in this document or any suggestions on how we can improve them?

About you

It's important we listen to people across Merseyside and Cheshire, treat people fairly and equally and ensure that no one gets left out. We also need to understand any views that may be specific to certain geographical areas or sectors of society. That's why we ask these questions. We won't share your information with anyone else and will only use it to help us make decisions and improve services. If you would rather not answer these questions you don't have to.

Are you replying as an individual or on behalf of a group / organisation?	
Individual <input type="checkbox"/>	Group / organisation (please specify) <input type="checkbox"/> _____

Which council area do you live in?	
Cheshire East Council <input type="checkbox"/>	St Helen's Metropolitan Borough Council <input type="checkbox"/>

Buddhism <input type="checkbox"/>	Christianity <input type="checkbox"/>	Hinduism <input type="checkbox"/>	Judaism <input type="checkbox"/>
Islam <input type="checkbox"/>	Sikhism <input type="checkbox"/>	Other religion or belief <input type="checkbox"/>	Prefer not to say <input type="checkbox"/>

Do you work for The Clatterbridge Cancer Centre?	
Yes <input type="checkbox"/>	No <input type="checkbox"/>

If you would like to be added to our email list for news about Transforming Cancer Care, please include your name and email address.

Name: _____
Email address: _____

**Thank you for taking part in the consultation.
Please send your completed response form to:**

Freepost - Patient & Public Voice,
Cheshire and Merseyside CSU, 65 Bevan House, 3rd Floor,
Stephenson Way, Liverpool, L13 1HN

What happens next?

You can find out more about Transforming Cancer Care, respond to the consultation, find out about consultation events in your area and download further information at **www.transformingcancercaremc.nhs.uk**. You can also contact the consultation team on **engagement@cmcsu.nhs.uk** or **0151 296 7068**. The consultation runs from **28th July 2014**. The closing date for responses is **19th October 2014**.

Your feedback will influence what happens next with Transforming Cancer Care. The consultation responses will be analysed by independent experts from Liverpool John Moores University who will then produce a report with recommendations for the NHS.

We aim to develop an outline business case incorporating that feedback and recommendations for approval by The Clatterbridge Cancer Centre NHS Foundation Trust, NHS England and Monitor in 2015.
